

Incubator-Clean™

Disinfectant solution for incubators and sterile benches in cell culture and molecular biology laboratory

Product No. A5230

Description

The problem of contamination in incubators and/or sterile work-benches is often a serious one, leading to extensive damage. Incubator-Clean™ solution prevents contamination with and growth of fungi (and spores), molds, bacteria (and spores), mycoplasma and viruses (including HIV and Hepatitis B). The active ingredients are quaternary benzylammonium compounds, and the solution does not contain mercury, formaldehyde, phenol or alcohol. Furthermore, Incubator-Clean™ is non-toxic and biodegradable. It was also found it to be fully compatible with common work surfaces (e. g. aluminium, tin plated iron, chrome, nickel steel, high grade steel and copper, polycarbonate). Incubator-Clean™ is a sterile filtered solution supplied in a one liter spray bottle.

Storage: Room temperature

Stability: min. 3 years

Recommended use:

Incubators: Spray incubators once every 2 weeks. It is not necessary to empty the incubator before spraying.

Sterile benches: Spray sterile benches once a day, or preferably before each laboratory worker begins to use the work area.

The drying time is the reaction time!
